SPACECRAFT REVERSED ENGINEERING Project

Disclaimer: none classified or secret material was used for the purpose of writing this text. Only publicly available sources were discerned.

1) Known characteristics:

Observed -

a) highly manoeuvrable (incredible agility)

Sudden change of movement direction, vertical drop from more than 20km height achieving force equal to the several hundred G`s - for comparison, the most extreme roller coaster has 6.3 G lasting just few seconds, fighter pilots sustain 8-9 G`s wearing special suits designed to keep the blood in the upper region in order to prevent from fainting. If there are biological entities in this crafts then they must use anti-gravitational safeguard for the compensation. Or they have no vital body fluids and their bodies are much more flexible.

b) hypersonic velocity

5 - 20 Mach.

Fastest aircrafts:

Mikoyan-Gurevich MiG-25 (Mach 3.2)

Lockheed SR-71 Blackbird (Mach 3.32)

North American X-15 (Mach 6.7)

NASA X-43 (Mach 9.6)

Source:

<https://internationalaviationhq.com/2020/06/27/17-fastest-aircraft/>

Fastest hypersonic missiles:

3M22 Zircon Missile (Mach 8)

Shaurya Missile (Mach 7.5)

BrahMos II (Mach 8)

Clearly, speed of the both military aircrafts and missiles came close to the Mach 10 but neither have even close manoeuvrability to that of the UFO`s (UAP`s).

c) smooth transmedium change (air -> water -> air)

As seen in the video footage available on the Internet.

<https://youtu.be/Ethg6FuW94U>

We can see how "space" craft, called Tic-Tac, smoothly changes the medium, from air into the water, in order to escape the military radar (or enter deep water alien base).

d) surrounded by energy field (darker or gray cube inside the sphere indicate that this energy field serves to create visual illusion of the craft's shape in addition of protecting it against radar detection and attack)

e) no heat signature

f) no signs of propulsion

Mysterious objects didn't have (visible) propulsion, didn't left any traces of it neither, and didn't broke the sound barrier, achieved sonic boom, when accelerating over 1,235 km/h. Outstanding aerodynamics.

Hypothesized -

g) shapeshifting (biomorph)

h) A. I. or remotely operated

i) warp drive

2) Energy source:

A) electromagnetism (exploitation of the Meissner-Ochsenfeld effect, tackling with the Higgs field)

There is a common side effect, mentioned by many witnesses, which is described as electromagnetic interference causing electronical equipment to seize functioning. Why do aliens use strong EM field other than to protect their vessels integrity? They use it to block the EM radiation making their spaceships invisible both to the human eye and scientific detectors provided so far. As well as to disrupt our communications and electronical systems. How can we discover their presence? Scan the surroundings for EM anomalies, mark and track (examine) them. Even better, neutralise with our own anti-EM device.

There are certain areas on the Earth of particular interest, showing huge geomagnetic disturbances, such as the Bermuda Triangle - in the Atlantic ocean near East Coast of the USA and Guadalupe - island close to the Baja California in the Pacific ocean. Are this two anyway related to the UFO (UAP) mystery?

Do UFO`s (UAP`s) use diamagnetic material utilising the Meissner-Ochsenfeld effect? Remember the magnet floating experiments? Or they exploit Earth`s geomagnetic flux oscillations?

B) advanced nuclear reaction without power loss meaning 100% or near 100% energy transformation efficiency

C) anti-matter

D) dark energy

+ quantum tunneling

Elaboration of each segment - a...i, A...D qt

Frame-to-frame analysis of the UFO / UAP movement

UFO / UAP image vivisection

Let us compare photo taken by William Rhodes back in 1947. and contemporary images from the US Navy video footage published in the last few years and confirmed by the Pentagon.

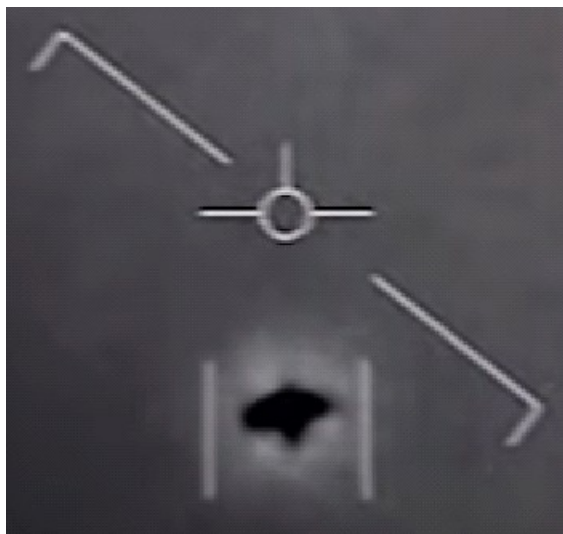

William Rhodes 07/07/1947, Arizona Republic 09/07/1947:

<http://roswellproof.homestead.com/files/rhodcomp.jpg>

Gimbal 2015. UFO encounter, nuclear aircraft carrier USS Theodore Roosevelt:

It is the same thing.

US Navy combat pilots witness account (eyewitness testimony) both word-by-word and speech examination

Pilots are using words and voice characteristics ("Gosh!") that are not suited for a dangerous encounter. Much better choice would be "my God! " or "Lord Almighty!". They could have been serious pretending to be concerned. Their naivety reveals their honesty. They are unrelated to the objects.

Comments made by an experts in the field of UFO / UAP research

"Commenting on the video, an ex-navy officer said that the technology on display is 100 to 1000 years ahead of that possessed by the United States."

<https://www.dailymail.co.uk/news/article-9590727/Ex-Navy-officer-says-UFO-technology-100-1-000-years-ahead-United-States.html>

<https://youtu.be/ZBtMbBPzqHY>

Conclusion

I think that both USA and China have countless unearthly data received by their military technology.

Misterious objects seen by the US Navy combat pilots do not have distinguishable markings. Moreover, if either Russia or China possess such a weaponry they would already attacked the West. Perhaps, war in Ukraine is the beginning? China is certainly watching and analyzing NATO`s response looking for potential weaknesses to step in with the annexation of Taiwan.

Israel is always under pressure from <Iran-Russia - China - Arab countries> synthetical coalition. I mean, Muslims, Orthodox and China allied? Who would say?

Did you know that, not so far ago, UFO fired at the helicopter belonging to the Italian army seriously damaging it?

The only possible solution beside E.T. background is that the "space" (we never saw them in the space) crafts are actually of the private origin belonging to some heavy arms dealer(s). This routes near Italy are very interesting to all kinds of pirates, drug and human traffickers. Maybe they acquired new weapons, not yet known to the governments world-wide? Private investors have much more funds at their disposal and they aren't bothered with the usual state bureaucracy corruption or incompetence issues.

Technology used is easily 50 years ahead of our current understanding.

Exotic chemical elements, not known to the human science yet, could produce phenomenal effects like spacetime distortion or fuel the warp drive.
